### **MODE button operation terminology**

- Tap (Left or Right) - A quick momentary slide of the MODE button to the left or right.
- Slide (Left or Right) - A slide of the MODE button to the left or right and hold for approximately 0.5 seconds.
- Hold (Left or Right) - A slide of the MODE button to the left or right and hold for approximately 1 second.
- Press - A press directly inward from the center resting position of the MODE button.

### **MODE button functions**

- Tap Left - For scrolling upward through the menu options.
- Tap Right - For scrolling downward through the menu options or to make selections.
- Slide Left - For returning to the previous menu (and entering optional heated grips menu, while in Riding Screen mode).
- Slide Right - For entering Traction Control menu, while in Riding Screen mode.
- Hold Left - For returning to the Riding Screen while in any menu screen.
- Press - For engaging selected settings and menu options.
